

About this Course

Every year, workers are accidentally exposed to unsafe levels of hydrogen sulfide gas, or H₂S. Even in small amounts, H₂S is dangerous when compared to other toxic gases. Too much H₂S in the air can kill a worker within seconds!

In this training module, we'll examine the hazards of H₂S exposure in the workplace, review the various health risks associated with H₂S, and go over what you can do to reduce H₂S exposure.

The average student will require approximately 20 minutes to complete both the course and quiz, and is awarded with a downloadable and printable certificate of training.

Course Outline

- What is H₂S?
- Health Effects of H₂S
- H₂S Equipment & PPE
- Assessing H₂S Hazards
- Emergency Procedures
- Mastery Quiz (80% to pass)

Verification Techniques Employed

- ✓ **Identity:** Unique usernames and passwords.
- ✓ **Security:** Bank-level encryption.
- ✓ **Certificate Verification:** Certificates contain a verification code that can be checked on MyOTF.com.
